Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Handbook of Meteorology: A Manual for Cooperative Observers and Students This text-book has been prepared for the use of cooperative observers and for the instruction of students in meteorology and aeronautics. It is essentially a laboratory manual. Part I is an elementary synopsis of the general principles of air science, but is not wholly restricted thereto. The subject of atmospheric transparency and the principles of visibility may not be logically a part of meteorology, but it is one of great importance, not only to air men, but also to every one engaged in transportation. The chapter on the dust content of the air in part summarizes the researches of author in this field. Part II is descriptive of the instruments used in meteorology and the construction and care of them. The methods of observation discussed is a resume of the experience of many observers covering a period of half a century. This part of the text is specifically designed for the use of cooperative observers and students. The Appendix contains conversion and other useful tables that are not included in the Circulars of Instruction published by the U. S. Weather Bureau. English units of measurement are used throughout the book, but the metric equivalents are used when necessary. In the final revision of the text, the author desires to express his appreciation for the counsel received from James H. Scarr, forecaster in charge of the New York City Weather Bureau Office, and to J. H. Kimball of the same office in charge of marine work. Acknowledgments are due to Dr. Charles F. Brooks, editor of the Monthly Weather Review, for the cloud photographs used, and...
