Not illustrated. 1913 Excerpt: the individual resistance of the patient, must control the dosage. There is no average dose--no average line that one can strike. There is no place where that is more beautifully illustrated than in the administration of tuberculin, because with tuberculin you can give one patient a thousand times the dose you give another, and the large dose will be too small and the small dose too large to produce the best opsonic resistance to the tuberculosis. These are the basic questions that we are endeavoring to work out in connection with the metastatic infections of the joint, and as our cases are mostly advance ones, they are difficult problems, but we are confident some one will soon take up the new treatment with a large clinical material and more rapid results will obtain. THE BLOOD-SUPPLY IN AND AROUND THE JOINTS The accompanying series of skiagrams, showing the bloodsupply in and around many of the important joints, were made in the X-ray Department of Dr. John B. Murphy s Clinic by Dr. George W. Hochrein, who does all the radiographic work for Dr. Murphy. The idea of these skiagrams suggested by Dr. Murphy had for its object the accurate determination of the blood-supply and its relations to the various joints, and are a great aid in determining the position of the flap pedicle used in arthroplasties. Professor Ranson, of the Department of Anatomy of the Northwestern University Medical School, prepared the cadavers by injecting the vessels with...
