By Armour Institute of Technology

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Armour Engineer, Vol. 11: The Quarterly Technical Publication of the Armour Institute of Technology, Chicago, Illinois An independent 24-inch line was to be run to the Portsmouth Navy Yard, while the Norfolk and Portsmouth, Berkley and Suffolk systems were to be tied in by a 20-inch subaqueous line across the eastern branch of the Elizabeth River. In this way it would be possible to augment Norfolk s supply by a pumpage of 5,000,000 gallons per day and assist her in supplying the demands of the immense army and navy bases, hospitals and other government projects. Further provision was made for placing a venturi meter at both Norfolk and Berkley ends of the subaqueous 20-inch supply line, so that the demands of Norfolk could be metered or vice versa in case of a breakdown on the Portsmouth, Berkley and Suffolk end. This project is then strictly a government enterprise brought on by war time needs. The construction work was divided into the Suffolk District, comprising divisions A, B, C and D, and the Portsmouth District...
